

# Online singing groups for people with dementia

Researchers at the University of Nottingham are looking for people to take part in a new study about the benefits of **online group singing** for people with dementia and their carers. The singing groups will be held on Zoom and will be relaxed, fun and informal. You don't need to have any previous experience of singing to take part. Technical support will be provided for those who are new to Zoom.

Do you...

Have a diagnosis of dementia?

Have a carer who can attend a singing group with you?

Have access to the internet and a computer, tablet or smartphone?

If the answer is yes, then you could be eligible to take part in the study.
