

Warm homes

- Q: Are you experiencing high energy bills?
- Q: Do you ever struggle to heat your home?
- Q: Is your home energy efficient?
- Q: Are you concerned that the health of you and your family is being affected by a cold or damp home?

We can offer help and advice to make your home as warm and healthy as possible.

Call us now on 0116 305 4286

We can offer you a healthy home check

This will look at your personal needs, your home and identify practical things that can be done to make sure your home is warm and energy efficient.

We want everyone to be able to live in houses that are warm and safe. Living in a cold home can affect your health and wellbeing.

We work closely with local councils, health and social care services and voluntary organisations in your area to provide a fast and effective advice and support service.

We provide independent, impartial advice and support on how you can improve your home and health. This can include:

- Understanding your living conditions to help you save money on energy.
- Looking at your energy suppliers and tariffs to make sure you are getting the best deals.
- Making sure you are getting any grants and benefits you are entitled to.
